

More flexible cleanroom operations than ever

Getinge cGMP washers and terminal sterilizers now come with SIEMENS SIMATIC WINCC Unified, a unified HMI platform for smooth and efficient cleaning and sterilization operations and data management.

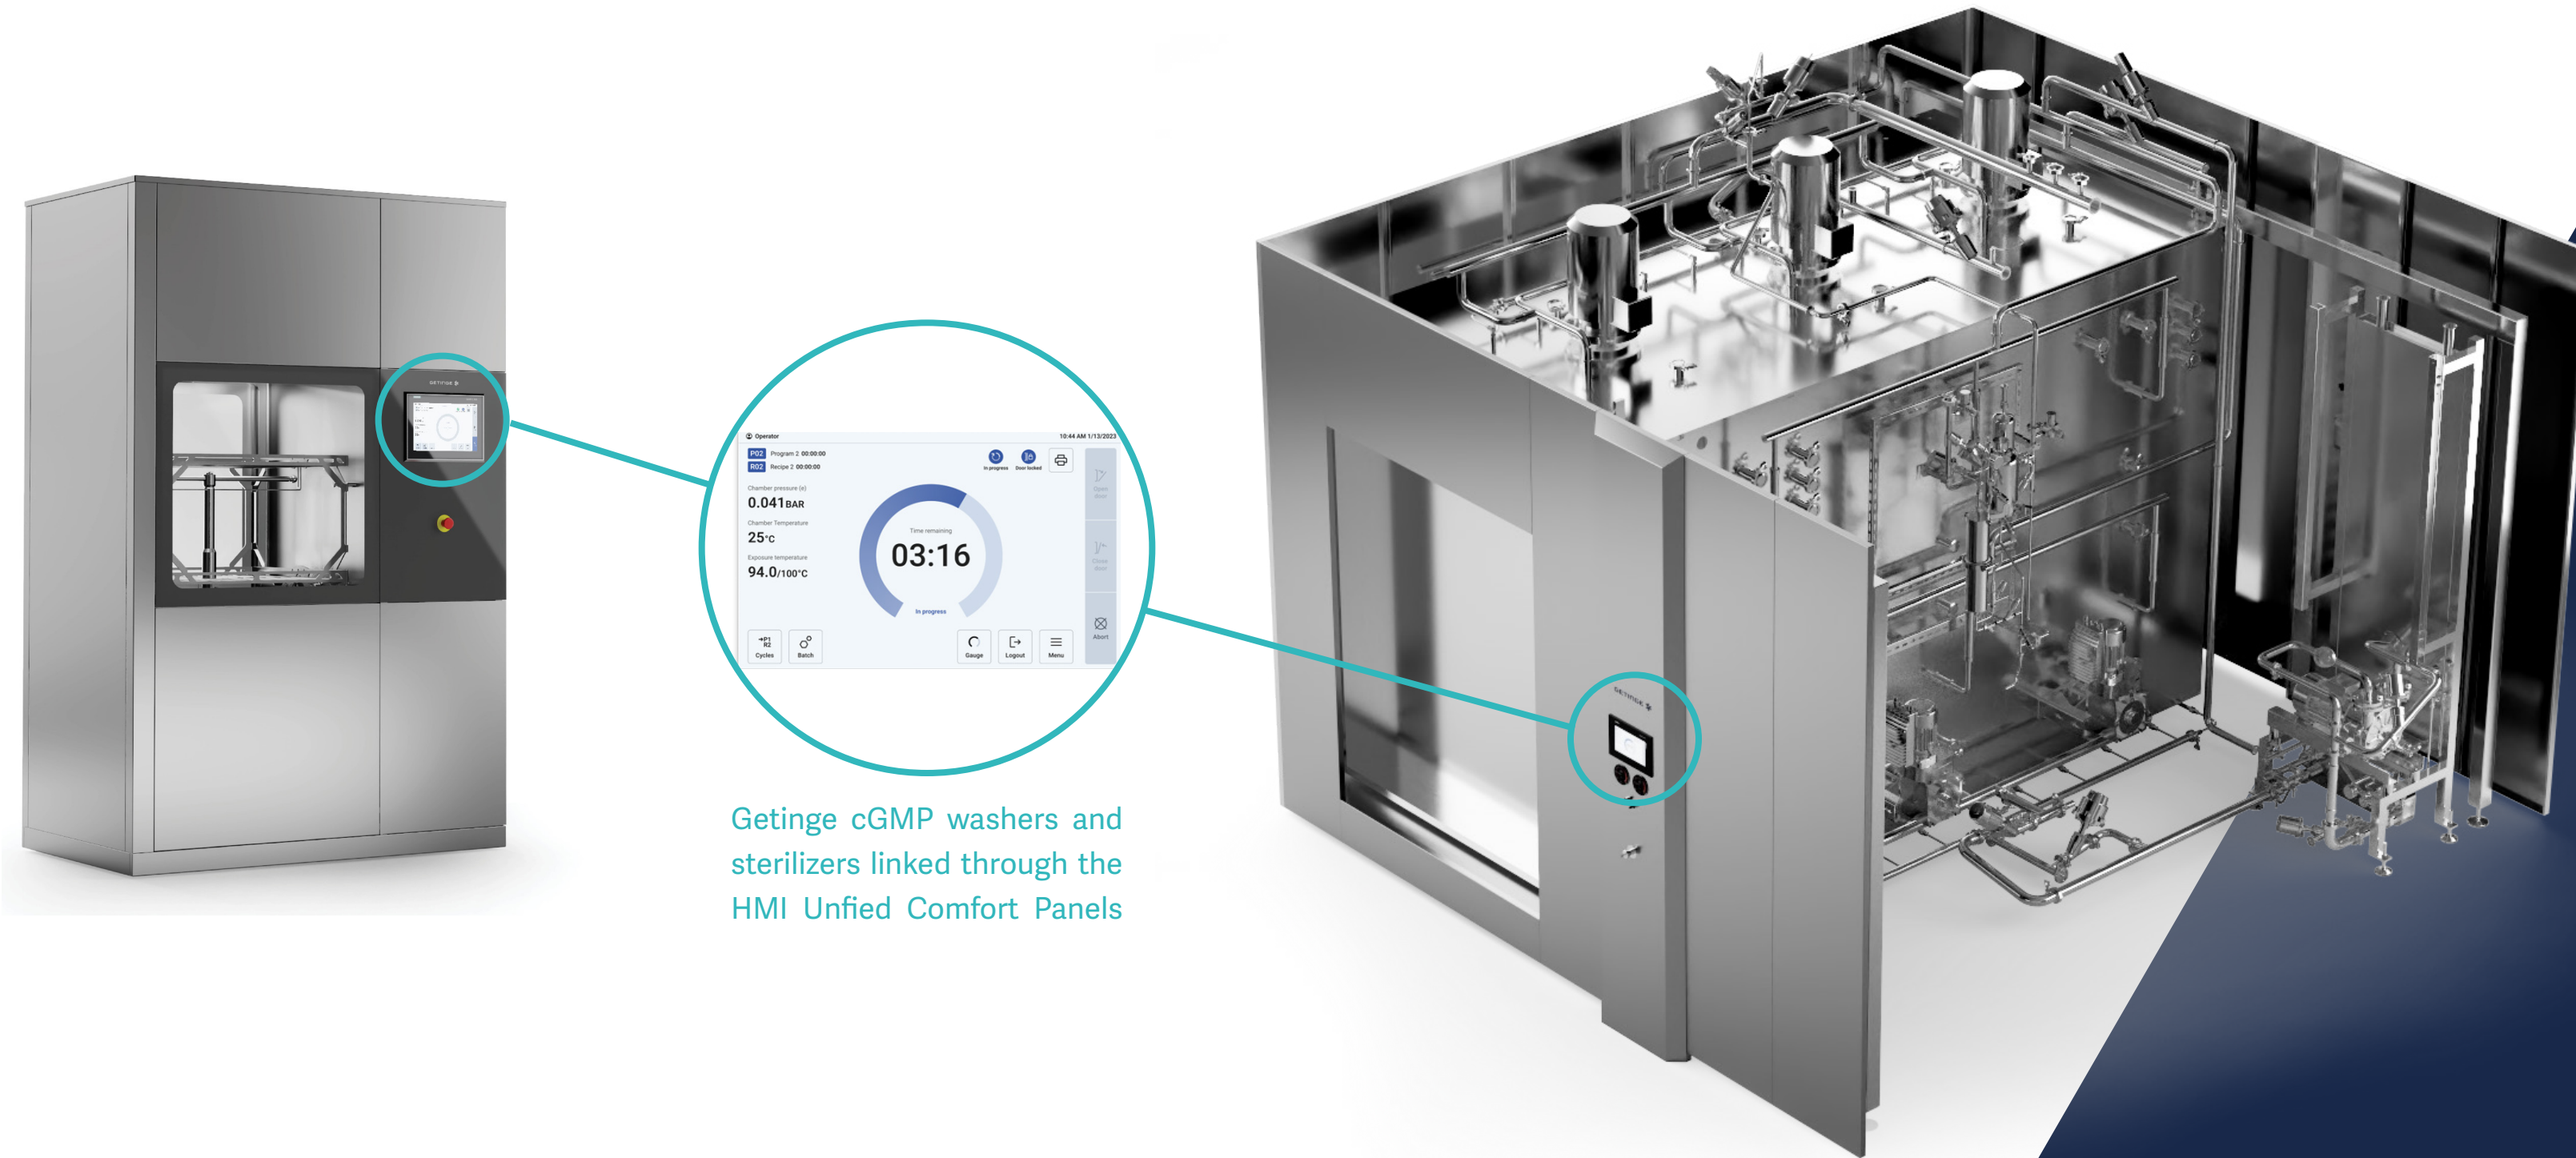

Future-proof cleanroom performances

Open and flexible visualization system for both cleaning and sterilization in the biopharma industry

Excellent operator control and monitoring with SIMATIC HMI, integrated in both Getinge cGMP washers and sterilizers.

The new generation washers and sterilizers come with the latest open interface, SIMATIC WinCC Unified, to meet the challenges of digitalization in the pharmaceutical industry. The SIMATIC HMI Unified Panels allow for collaboration between Getinge cGMP washers and sterilizers to reduce engineering effort and to seamlessly integrate usability.

Getinge cGMP washers and sterilizers linked through the HMI Unified Comfort Panels

Benefits of our control system with SIMATIC HMI

- + Simplified procurement process
- + Ease of validation
- + Regulatory compliance
- + Efficient data management
- + Secured data integrity
- + Ease of use with less training needed
- + Efficient operating with quick handling
